DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 9, 16 and 17 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 6 of U.S. Patent No. 6,912,034. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference is that claim 6 of U.S. Patent No. 6,912,034 does not explicitly claim transistors disposed at intersections of gate lines and source lines. However, this was so well known and obvious to those of ordinary skill in the art that placing transistors at these intersections is the standard method of providing a switching device for the pixel electrodes. And because the conflicting claims are otherwise identical in scope, claims 1, 9, 16 and 17 are hereby rejected under obviousness-type double patenting.

Art Unit: 2871

Response to Arguments

Applicant's arguments with respect to claims 1, 9, 16 and 17 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 2-8, 11, 12 and 18 objected to as being dependent upon a rejected base claim, but would be allowable if the double patenting rejections discussed above were overcome.

The following is a statement of reasons for the indication of allowable subject matter: the prior art did not teach or suggest that a ratio of a first voltage applied to the liquid crystal by the first pixel electrode and a second voltage applied to the liquid crystal by the second pixel electrode is 0.5:1.0 to 0.9:1.0.
